	The existing schools may be strengthened by opening additional sections
	2 The aided schools in these localities may be induced to improve and strengthen themselves by raising the grants-in-aid to $\frac{2}{3}$ rds of the cost of the schools
	3 New schools at Govt cost may be opened only when absolutely necessary
	2 ~~Hon'ble~~ maximum scale of Establishment of a new school in Bangalore is also proposed to cost Rs 112 p m and in the other places Rs 87 p m for schools in other places
	3 The DG requests that he may be given sufficient liberty of action in the matter of ~~sanctioning~~

SIR

I have the honour to submit for the information of Government that out of the fifteen places brought under the operation of the Elementary Education Regulation in Government Order No 12568-Edn 334-13 4 dated 13th June 1914 work on practical lines has been actually started in all of them except in three places Tumkur Chikballapur and Chikmagalur On account of the outbreak of plague at Tumkur and Chikballapur it became necessary to postpone the introduction of the Scheme Now that people are beginning to return to their homes action is being taken As regards Chikmagalur revised proposals about constituting the School Committees are expected to be received in a few days from the Deputy Commissioner when the work of starting the Scheme will be taken in hand

The practical working of the scheme in most of the places selected and the collection of statistics relating to school-going boys between the ages of 7 and 11 indicate however the need for opening more primary schools in all the places where compulsory education has been or is being introduced The enclosed statement gives the number of existing schools the number of boys between the ages of 7 and 11 now under instruction and the number of those for whom provision is required In column 7 of the statement is shown roughly the additional

number

number of schools proposed for each place either by the School Committees or by the Departmental officers

From my knowledge of the working of the scheme, I find, however that it is inadvisable to open a number of new schools simultaneously In the larger places mentioned, such as Bangalore or Mysore by a redistribution of the schools or by the opening of one or two additional sections of classes, it becomes, I believe, possible to accommodate a larger number of children Then again in the Mysore and Bangalore Cities as well as in some other places, there are a number of schools maintained or aided from Municipal or other funds which have a number of inefficient teachers on account of the salary being low If these teachers are withdrawn and better teachers are substituted, a larger number of boys can be hand'n in each class and the schools can admit more boys

In these circumstances, I am not in favour of opening at onc ge number of schools I think in the interest of economy it s desirable to improve the staff and accommodation of the existing chools and only after their full strength is reached, more schools eed be opened Of course there are a number of localities where o schools exist at present and where it will be necessary to open ew schools These may be treated on their own merits, but in localities where there are Government or aided schools, the first effort hould be to improve them so as to facilitate the admission of more oys

It is found that in the Cities of Mysore and Bangalore higher rates of pay are needed on account of the greater costliness of living than in the other places and I accordingly propose that the following scales of pay, etc for primary schools may generally be accepted by Government -

Mysore and Bangalore Cities	1 Head Master	Rs 25	a month
	1 Assistant Master	20	"
	1 do	15	"
	1 do	12	"
	House rent about	25	
	1 Peon	7	"
	1 sweeper	5	"
	1 scavenger	1	" allowance
	contingencies	2	"
	Total	Rs 112	"

Tumkur and the remaining 11 places	Head Master	Rs 20	a month
	Assistant Master	15	"
	do	12	"
	do	10	"
	House rent about	15	"
	Peon	7	"
	Sweeper	5	"
	Scavenger	1	" allowance
	Contingent charges	2	"
	Total	Rs 87	"

Where there are aided or Municipal schools the same scales of pay are to be adopted as far as possible and the Inspector General may be permitted to give grants-in-aid towards the cost from one-half to two-thirds for the next three years to come effort being made in the meanwhile for the reduction of the Government gra above one-half if any by the improvement of the school finances where it becomes absolutely necessary to open Government Schools the full cost has of course to be met from Government funds I shall however endeavour to start as many new aided schools as are practicable and it is only when the resources in this direction are exhausted that new Government schools will be allowed to be opened I request that Government may be pleased to invest the Inspector General with sufficient liberty of action in this matter as I wish to interest the local people as largely as possible in the maintenance of efficient primary schools in their midst and make the funds generously made available by Government go as far as possible in the spread of education 6

In the current year's Budget thereis a provision of Rs 25 000 to meet the cost of the above proposals under 18--Education (4)
